

Market segment: Government

2N[®] Netspeaker

More than just an audio system

SUITABLE FOR:

- SCHOOLS
- UNIVERSITIES
- GOVERNMENT OFFICES AND INSTITUTIONS

BENEFITS:

- LIVE ANNOUNCEMENTS
- PROGRAMMED SCHOOL BELLS
- LISTENING EXERCISES
- SCHOOL RADIO

2N[®] Netspeaker

More than just an audio system

Concept: IP Audio system

We encounter audio systems in many places every day without, in fact, even realizing it. Whenever we enter a department store, a bank or while waiting for a train or travelling on the underground, various audio systems bombard us with music, advertising messages, information on arriving trains, and so on. Audio systems in general are used to inform the public, for example, passengers, customers, employees or students using audio announcements.

Audio systems have been part of our lives for decades and over that time, they have fulfilled the same purpose. The arrival of IP however has simplified and quickened the implementation and installation of these systems, with an increasing number of attractive possibilities for their use. Former limitations such as a low number of zones have become totally obsolete with the arrival of the NetSpeaker IP Audio System. For example, different audio content can be sent to various parts of a building according to operating requirements.

Functions: This modern audio system offers the distribution of audio information via the IP network, enabling the user to make central announcements or play music anywhere from a small café to a multinational chain of restaurants or stores, etc. The time planner function addresses the need for regular school bells, scheduled advertising messages, making information announcements, etc.

System administration: The system includes a set of SW applications designed for both standard end users (e.g. the owner of a café can use the simple NetSpeaker player to play a set of favorite music playlists) and system administrators to manage users, zones, playlists, internet radio and set rules for the distribution of audio content via a graphic interface.

Solutions:

School classrooms

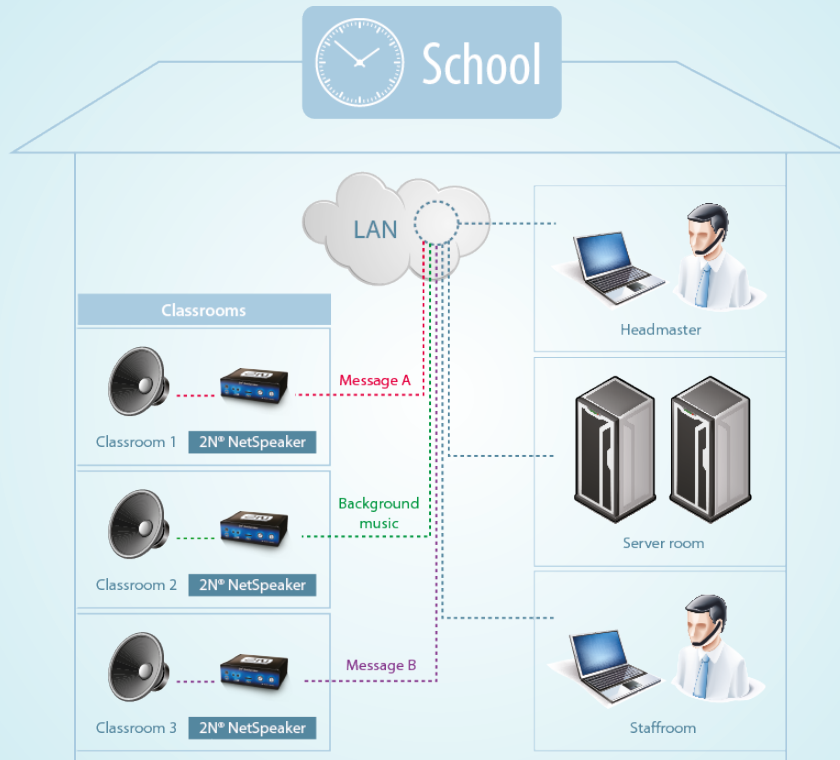

The 2N® NetSpeaker IP Audio System is no longer just a tool for the school principal's announcements, which was once the case at primary schools. Thanks to its flexible structure, the system offers a much wider range of everyday use for educational institutions. Each teacher is allocated classrooms and areas in the system to which they can send information or audio examples from their notebook in the interests of enhancing tuition. Similarly, the Planner function ensures school bells are rung every day at the set time in those areas of the school where it is appropriate. During breaks, for example, older students can use the NetSpeaker system as a school radio station.

Language rooms

There is no more need to invest in additional equipment to play music, audio examples or foreign recordings in specialized classrooms. The 2N® NetSpeaker system can fully handle this function. A music or language teacher can thus send and present prepared examples, text or listening exercises to students in a concrete classroom from his/her own notebook.

Corridors

Just as in classrooms, important announcements, school bells indicating the beginning and end of lessons, as well as student or public internet radio during breaks also need to be heard in corridors. The 2N® NetSpeaker audio system can handle all these functions to your complete satisfaction.

2N TELEKOMUNIKACE

We are an international company based in the Czech Republic specializing in the development, manufacture and sale of IP intercoms. We have been active on the market since 1991 and we currently have 150 employees. We are proud of our high quality and reliable product portfolio. Our intercoms are the most technologically advanced products on the market, which is confirmed by important certification from Cisco or Avaya.

Thanks to our development and manufacturing facilities and years of experience, we can flexibly respond to the needs of the market and individual customers. We can meet the requirements of the most demanding clients, who we offer tailor-made solutions to meet their exact needs.

We are continually expanding our operation and currently do business with partners in more than 125 countries. You will find our branches all over the world.
